

How to use the Complexity Visualiser (Wolfram CDF Version)

James Marshall - 21st January 2014

To use the Complexity Visualiser you must install Wolfram CDF Player on your computer:

<http://www.wolfram.com/cdf-player/>

Syntax for functions is as for Mathematica and Wolfram Alpha (<http://www.wolframalpha.com>):

2^n for exponentiation

$1+(2*n)$ for arithmetic

$\text{Log}[n]$ for natural logarithm (**$\text{Log}[b,n]$** for logarithm to base **b**)
