

Index of Notation and Concepts

X-machines	page 4 & definition 2.2.1, page 18
automaton, finite state machine (FA)	definition 2.11, page 8 & page 90
deterministic FA	page 8 & page 90
1	page 8
regular expressions	definition 2.1.1.2, page 9
regular language	definition 2.1.1.3, page 9
pushdown automaton (PDA)	definition 2.1.2.1, page 10
deterministic PDA	page 10
phrase-structure grammar	definition 2.1.2.3, page 11
context-free-grammar	page 12
context-free language	page 12
regular grammar	page 12
Turing machine	definition 2.1.3.1, page 13
recursive enumerable language	2.1.3.3, page 14
Halting Problem	page 14
context-sensitive language	page 15
recursive language	page 15
Φ	definition 2.2.1, page 18
F (next state function)	definition 2.2.1, page 18, page 90
arc	definition 2.2.2, page 19
path	definition 2.2.3, page 19
behaviour of \mathcal{M}	definition 2.2.4, page 19
relation computed by \mathcal{M}	definition 2.2.5, page 20
deterministic stream X-machine	definition 2.2.6, page 20
Σ (input alphabet)	page 20
Γ (output alphabet)	page 20
M (memory)	page 20
language accepted by \mathcal{M}	page 21
In	page 21
Out	page 21
Mem	page 21
δ	page 22
head	page 22
front	page 22
tail	page 22
rear	page 22
straight-move stream X-machine (SMS X-machine)	definition 2.3.2, page 23
α	page 23

β	page 23
Φ_1	page 23
Φ_2	page 23
Φ_3	page 24
Φ_3	page 24
Φ_1'	page 24
Φ_2'	page 25
L_s	definition 2.3.6, page 26
L_{-s}	definition 2.3.6, page 26
R_s	definition 2.3.6, page 26
R_{-s}	definition 2.3.6, page 26
I	definition 2.3.6, page 26
k-stack SMS X-machine	
E	page 28
stream X-machine (S X-machine)	definition 2.4.1, page 37
generalised stream X-machine (GS X-machine)	definition 2.4.1, page 37
fully computable	page 38
k-stack S X-machine	definition 2.4.4, page 39
real time stack language	page 40
prefix	definition 2.4.1.1, page 41
regular prefix	definition 2.4.1.6, page 42
rev(x)	page 43
R_{-s}	definition 2.4.19, page 43
Regular Stack S X-machine (RStack S X-machine)	definition 2.4.1.12, page 43
$\Psi_{q.q'}$	page 45
Ψ	page 45
Stack Stream X-machine with markers (MStack S X-machine)	definition 2.4.3.1, page 56
R_{-f}	page 71
ϕ	page 74
u (transition function)	definition 3.1.1, page 75
v	definition 3.1.1, page 75
w	definition 3.1.1, page 75
λ (output function)	definition 3.1.1, page 75
u_e (transition function)	definition 3.1.2, page 75
v_e	definition 3.1.2, page 75
w_e	definition 3.1.2, page 75
λ_e (output function)	definition 3.1.2, page 75
parallel composition	definition 3.3.1.1, page 84
sequential composition	definition 3.3.2.1, page 84
stream function	definition 3.1.9, page 77
generalised stream function	definition 3.1.11, page 78
G (output function)	page 90
F_e (extended next state function)	page 90
G_e (extended output function)	page 90
$F_{e.q}$	page 90

$G_{e,q}$	page 90
morphism	definition 3.4.1.1.1, page 91
proper morphism	definition 3.4.1.1.2, page 91
isomorphism	definition 3.4.1.1.4, page 91
accessible finite state machine	definition 3.4.1.2.1, page 92
S- equivalent states	definition 3.4.1.2.3, page 92
equivalent states	definition 3.4.1.2.3, page 92
reduced finite state machine	definition 3.4.1.2.5, page 93
minimal finite state machine	definition 3.4.1.2.7, page 93
Q-minimal w.r.t. Φ	definition 3.4.2.6, page 97
output-distinguishable Φ	definition 3.4.2.9, page 99
complete Φ	definition 3.4.2.11, page 99
covering of \mathcal{M} w.r.t. Φ	definition 3.4.3.1, page 101
minimal covering of \mathcal{M} w.r.t. Φ	definition 3.4.3.2, page 102
$\mathcal{A}' \geq \mathcal{A}$	definition 3.4.3.4, page 102
admissible decomposition of Q	definition 3.4.3.6, page 103
domain compatible states	definition 3.4.3.7, page 103
domain-consistent decomposition	definition 3.4.3.8, page 104
\mathcal{M}/H	definition 3.4.3.10, page 104
category-partition	page 112
adequate test set	page 114
characterisation set	definition 4.1.4.1.2, page 115
state cover	definition 4.1.4.1.3, page 115
transition cover	definition 4.1.4.1.4, page 116
transition tree	page 118
'design for test' conditions	page 123 & page 180
test function	definition 4.2.1.1, page 124
fundamental test function	definition 4.2.1.1, page 124
prefix of	definition 4.2.9.1, page 156
pref(x)	definition 4.2.9.1, page 156
Pref(x)	definition 4.2.9.2, page 156
(generalised) stream X-module	definition 4.2.10.1, page 157
refinement modules	page 159
final state	page 159
control machine	page 160
type A transitions	page 160
type B transitions	page 160
c	definition 5.1.1, page 162
d	definition 5.1.1, page 162
Ref (refinement function)	definition 5.1.1, page 162
refinement of \mathcal{M} w.r.t. Ref	definition 5.1.1, page 162
\mathcal{R} (refinement set)	definition 5.1.1, page 162
transfer functions	definition 5.1.1, page 162
trivial refinement module	page 165
proper refinement set	definition 5.1.2, page 165
Φ_{i1}	definition 5.1.2, page 165
Φ_{i2}	definition 5.1.2, page 165

empty_seq	page 169
simple refinement	definition 5.3.1.1.2, page 180
\mathcal{M}_1 complete w.r.t. ϕ	definition 5.3.1.2.1, page 181
complete refinement	definition 5.3.1.2.2, page 181
$\Phi_{i1}[p_{io}]$	page 184
fully output-distinguishable ϕ 's	definition 5.3.1.3.1, page 184
output-distinguishable refinement modules	definition 5.3.1.3.2, page 185
output-distinguishable refinement set	definition 5.3.1.3.3, page 184
fundamental test function of the refinement	definition 5.3.2.1, page 185
